DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of III in Paper No. 14 is acknowledged. The traversal is on the ground(s) that the restriction in the previous office action (Paper No. 13) was based upon canceled claims amended in the preliminary amendment mailed 23 February 2001 and filed 2 May 2003 (Paper No. 14). The preliminary amendment was not present in the application at the time of the restriction of the previous office action and the examiner regrets any inconvenience to the applicant. A new restriction requirement is set forth with the currently pending claims 99-126.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 99-106, drawn to isolated antibodies of human neurturin, classified in class 530, subclass 387.1.
 - II. Claims 99-106, drawn to isolated antibodies of mouse neurturin, classified in class 530, subclass 387.1.
 - III. Claim 107-126, drawn to methods of detecting neurturin and non-neurturin GDNF family member using antibodies of human neurturin, classified in class 435, subclass 501.
 - IV. Claim 107-126, drawn to methods of detecting neurturin and non-neurturin GDNF family member using antibodies of mouse neurturin, classified in class 435, subclass 501.

The inventions are distinct, each from the other because of the following reasons:

The products of inventions I and II, are distinct each from the other, because they are drawn to products having materially different structures.

Inventions of product I and II, and process inventions III and IV are related as product and alternate processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the products can be used for immuotherapy.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classifications and the search required for any one of inventions I-IV is not required for any other invention I-IV, thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
